## 620. Not Boring Movies

Easy 866 524

Companies

[SQL Schema](#) > [Pandas Schema](#)

Table: Cinema

Column Name	Type
id	int
movie	varchar
description	varchar
rating	float

id is the primary key (column with unique values) for this table.  
Each row contains information about the name of a movie, its genre, and its rating.  
rating is a 2 decimal places float in the range [0, 10]

Write a solution to report the movies with an odd-numbered ID and a description that is not "boring".

Return the result table ordered by **rating** in descending order.

The result format is in the following example.

## Example 1:

## Input:

Cinema table:

id	movie	description	rating
1	War	great 3D	8.9
2	Science	fiction	8.5
3	Irish	boring	6.2
4	Ice song	Fantasy	8.6
5	House card	Interesting	9.1

## Output:

id	movie	description	rating
5	House card	Interesting	9.1
1	War	great 3D	8.9

## Explanation:

We have three movies with odd-numbered IDs: 1, 3, and 5. The movie with ID = 3 is boring so we do not include it in the answer.

MySQL Auto

```
1 # Write your MySQL query statement below
2 SELECT *
3 FROM Cinema
4 WHERE id%2 = 1
5 AND NOT description = 'boring'
6 ORDER BY rating DESC
```

Ln 6, Col 21
